Dates for 2008

- ★ Session 1
June 2 to June 27
- ★ Session 2
July 9 to August 5

Modern Explorations into Economic Foundations

Are you applying to or enrolled in a doctoral program in economics? Are you an economics professor? Then consider spending June or July in a stimulating intellectual environment. Live, learn, read, and write with top caliber students and scholars of Economics.

At the AIER Summer Fellowship Program you will gain a unique, objective perspective into economic, monetary, and social issues.

Have you ever wished to learn economics free from the influence of politics, government, corporate interests, special interests and individual agendas?

As an independent, nonprofit economic research institution, AIER is free from the influence of any special interest or concentration of wealth.

This independence allows us the freedom to focus on educating students by moving

beyond textbook economic and social theory. At AIER, participants apply a historical, institutional, and methodological focus to economics, as distinct from traditional undergraduate and graduate instruction.

Student fellows receive a \$1,200 stipend, and room and board. All qualified students are eligible to apply for graduate school financial support — our average *in-absentia* fellowship award exceeds \$5,000.

Visiting research fellows receive a stipend, housing, office space and access to our extensive library at AIER's scenic 100-acre campus.
